Claims 1-18 NO

Industrial applicability (IA)

Claims 1-18 YES

**2. Citations and explanations:**

Claims 1-18 lack an inventive step under PCT Article 33(3) as being obvious over Keith (US Pub. No. 2001/0042040 A1).

Claims 1-18, Keith teaches a system for routing a trading order to a market center comprising a memory and a processor (See Figure 1). The memory stores a trading order specifying a trading product (See Paragraph 341). The processor determines a plurality of market center prices for the trading product, each market center price associated with at least one of a plurality of market centers (See Paragraph 73). The processor selects one of the plurality of centers based upon the determined market center prices (See Paragraphs 162-173). The processor further determines a disclosure policy for the selected market center (See Paragraph 181) and routes the trading order to the selected market center according to the determined disclosure policy (See Paragraphs 174-183).
